Education

School of Science, The Hong Kong University of Science and Technology

Bachelor of Science in Data Science and Technology

September 2024–August 2028

CGA: 3.54/4.3

- **Awards & Honors:** 2024–25 Spring: Dean's List; Soong Ching-ling Foundation (中国宋庆龄基金会“未来工程”大学生奖助学项目“致远助学基金”); Nanyang Technology University (exchange) — 26 summer
- **Foshan No.1 High School** — Score of 654 in the Guangdong Gaokao (College Entrance Examination), Ranking in the top 0.3% of the Province (2199th).

Research Experience

Undergraduate Research Opportunities Program (UROP1000)

Summer, Fall 2025

Supervisor: Prof. LIN Nian, HKUST

- Analyze the characteristic of 2D-metal-organic framework (MOF) under ultra-high vacuum (UHV) by using STM.
- Learned the principle of STM.
- Perform sputtering on a sample to clean it.

Internship Experience

CDCC limited company (广州华数云计算有限公司)

04/01/2026 — 30/01/2026

- Apply AI tools on website development
- Website backend developer.
- Help build an agent related to work recommendation system for graduate students.
- Archiving, scanning and arranging business contracts.

Extracurricular Activities

UGTA in computer commons

26 spring

- Help student solve programming problems
- Assist professor's teaching

Peer mentor of School of Science

2026–2027

- assist the school of science organizing activities
- Help freshmen adapt to new university life

Hong Kong SDG Hackathon

January, 2025

Team member (Developer)

- Collect UG/PG admission information related to universities around the world
- Help create an agent that provide essay suggestions according to clients' requirement

Info Day – DSCT Department

Nov, 2025

Helper

- Promote the school to prospective students and their parents during visits
- Provide consultation
- Organize lab tours for visitors
- Collect photos for promotional use

JEE admission interview

Helper

- Introduce HKUST to parents of the JEE student
- Help organize the interview

Skills & Others

Computer Skills: Complete the training provided by Nvidia, HKUST CSE department and AI lab related to machine learning; Python Programming (Familiar Libraries: NumPy, Pandas, Matplotlib; Algorithms mastered: Naïve Bayes, KNN, K-mean values, Artificial Neuron Networks, MLP).

Experimental Skills: Data Error Analysis; Using Python, Excel or R for statistical analysis, data visualization, and various curve fittings; Data Distribution Test. Using AI tools like cursor to develop or build up project.

Languages: Native speaker of Chinese and Cantonese. Proficiency in English (TOEFL 103 before Jan 1st 2026 with Reading 30, Listening 25, speaking 23, writing 25)
